

LATTY[®] LLS New tightening system with automatic adjustment

LATTY[®] Live Loading System at low cost

The response to fugitive emissions

Factory pre-set
lockable cartridge

Easy to fit

LATTY[®] SOS software available

Patent No's.

GB 2271 163, EP 93115282.1-, US S.N. 08/129, 858

LATTY® LLS

The ultimate in
valve sealing technology

Packing Selection Options

1. **LATTYgraf 6117** or **LATTYgraf 6118** end rings with **LATTYgraf E/E1/E2/E2P** or **LATTYgraf EMB**
2. **LATTYgraf 6940**
3. **LATTYgraf 6117** or **LATTYgraf 6118** alone
4. **LATTYlon 3260 LM**

- In the last 15 years, LATTY International has concentrated on solving valve stem leakage problems associated with inadequate sealing efficiency.
- After years of analysis, investigations, follow-ups and inspections, LATTY International can confirm that valve stem leakage is no longer considered to be a problem.
- Practical experience dictates that, by careful selection of packing materials, LATTY International can offer maximum choice with a solution to seal your valve with the new LATTY LLS.
- With the added security of accurately predicted load control, automatic adjustment is assured for small volumetric losses due to wear.
- Sealing efficiency resulting in increased reliability gives the longest possible **emission-free** and attention-free service life for valves, as demanded by our end-users and OEM's.
- The LATTY Live Loading System is easily fitted with no measurement tools or specially trained staff necessary.
- A recently released software package, LATTY SOS enables the user to select the appropriate LATTY live loading systems for most sealing applications.

The information given in this document is for guidance only and does not commit LATTY International in any way. LATTY International does not warrant the performance of its products, unless properly fitted and used in accordance with the instructions, nor can accept any claim for consequential reliability.
