

FOOD INDUSTRY

YOUR SOURCE FOR ALL INDUSTRIAL SEALING SOLUTIONS

MECHANICAL SEALS

Sealing efficiency is one of the major concerns of maintenance service GROUPE LATTY® offers a range of products dedicated to process pumps. Our teams assist you in the recommendation of mechanical seals, dynamic seals, rotary unions or cartridge seals that are suitable for your agitators, pumps or mixers, etc.

Before

After

SERVICES

The reconditioning, study and research in order to improve the sealing systems in your standard or specific mechanical seals, cartridge boxes, agitators or pumps, etc., are one of our key priorities. Our technicians will guide you on site through your diagnostics or provide suitable training. LATTY International S.A, an officially registered training centre, can also provide training on its own plant near Paris.

PACKINGS

From boilers to food processing, all our product range is compliant with the requirements of the food industry. The use of quality products guarantees you safety, increased lifetime of your equipment (valves and fittings, homogenisers, pumps, etc.) as well as reduced maintenance cost.

FLANGE GASKETS

From aramid fibre through high-temperature and high-pressure resistant graphite gaskets to PTFE, GROUPE LATTY®, through its large product range, provides you optimum operating quality as well as the sustainability of all your static sealing solutions.

GROUPE LATTY® has been providing you with high-end industrial sealing solutions for 95 years. With our research and development department, we are developing product ranges up to the standards and certifications applicable in the food industry such as FDA, WRAS, EC 1935/2004, EHEDG, ATEX, etc.
